524	1923	Scarce early commercial airmail letter, 31.VII.23 from Wien to Weggis (CH) 'via Zürich' last day of Period 10. FLUGPOST handstamp and a weak red 'Mit luftpost befördert / Flugpostamt München 2' cachet and a WEGGIS (LUZERN) arr. 2.VIII 23. A surface letter to CH should have been franked 1500 K (or 2250 K up to 40g). Actual franking 1000 K & 500 K + 3000 K airmail. (Total 4500 K). The airmail fee Wien - München was 600K to 20g, 900K to 40g. The extra amount for airmail München - Zürich was 100M (20g) or 200M (40g), the same as München - Wien. So assuming that the Austrian airmail surcharge W>M>Z was double the fee to Munich, the total would be 2700K (20g) or 4050K (40g).It seems likely that the weight would have been over 20g. So 450K overfranked? It looks commercial (no philatelist would like a 500K stamp torn in half before use...). Maybe he doubled the surface rate and hoped for the best? A scribble on the back seems to ask for confirmation he'd franked correctly! Interesting and a display item!	£44
